OBITUARY

MRS. JOSEPH MARK

A PLEDGE To The Citizens of

LINDSAY

HAVING been authorized by the Liquor Control Board of Ontario to operate Beverage Rooms, we are taking this opportunity of advising the citizens of Lindsay that it is our intention to justify the confidence placed in us.

WE realize that the abuses of a few, fall on many, but it is our purpose to keep our premises in such a manner that the fair-misted people will have no cause for complaint; which an inspection of our respective places of business will reveal.

IT is our intention to respect the will of the people and fully observe the regulations of the board.

WE are voluntarily closing our beverage rooms at 10 o'clock p.m. Saturday nights, and 11 p.m. other nights.

John Citizen talks to John Citizen about

Converting His Victory Bonds

"WELL, John, I see that the Government wants us to convert our Victory Bonds. Are you going to convert yours?"

"I have already converted them into the 15-year 35% Bonds of the Refunding Loan."

"You have? What made you do that? Don't you think you might have done better?"

"No. I don't " "Why not?"

"For the very good reason that I have been in and out of lots of investments and speculations since 1919, and some of them have given me plenty of worry. But I have never lost a wink of sleep over my Dominion of Canada Bonds."

"That may be, but there is a big difference between 55% and current interest rates."

"That's true. But in the past few years the losses I have made in buying investments with my mind more on high return than safety have been just too bad. If I had been content to invest all my surplus in Dominion of Canada Bonds at even less than 3%, I vould have been money shead. Haven't you, yourself, lost any capital through unvise investments?" "I'll say I have . . . but still---"

"Still nothing, John. I've learned from hard ex-perience that if my principal isn't safe then I haven't made a good investment."

"Well, how do you account for the difference between 5% and a yield of 3.81%?"

"Easily enough. Compare conditions in 1919 with what they are today. In 1919 money rates were war-time rates. All nations were bidding for capital.

Canada, Great Britain, the United States and other countries were obliged to pay abnormally high rates for loans. Today, money is much cheaper. I was reading, for instance, that Canada had borrowed money at 2% in New York for a short term, and in London at less than 3%% for a long term."

"That's right-I remember seeing that." "Multi split-i remember seeing that."
"Well, doom! that show how good Canada's credit
is? The way I look at it is that if Canada can horrow
money abroad at these rates that if Canada can
money abroad at these rates that if is up to us to
the control of the control of the control of the

"There is something in that, but why only 3.81%?" "There is something in that, but why only 3-atom." "Recause that is the rate at which Dominion Bonds are now selling in the open market. That is the rate at which our incurrence Componies and other established to the selling the selling to accept these rates, then get asfety they are willing to accept these rates, then I ought to be satisfied. I would rather have 3.81% and be safe than go after twice as much and be moreous about the satisfied of your principal.

"After all, Canada has done pretty well in paying 5½,"
for afteen years. So, now, we can afford to do a bit in
return. I think it is up to everybody to get behind
this Loan and make it a success. A successful Loan
is bound to help business."

"Well, John, I hadn't thought the matter out to quite shat extent but I guess you are right. I shall convert my Bonds too."
